SAFETY FIRST

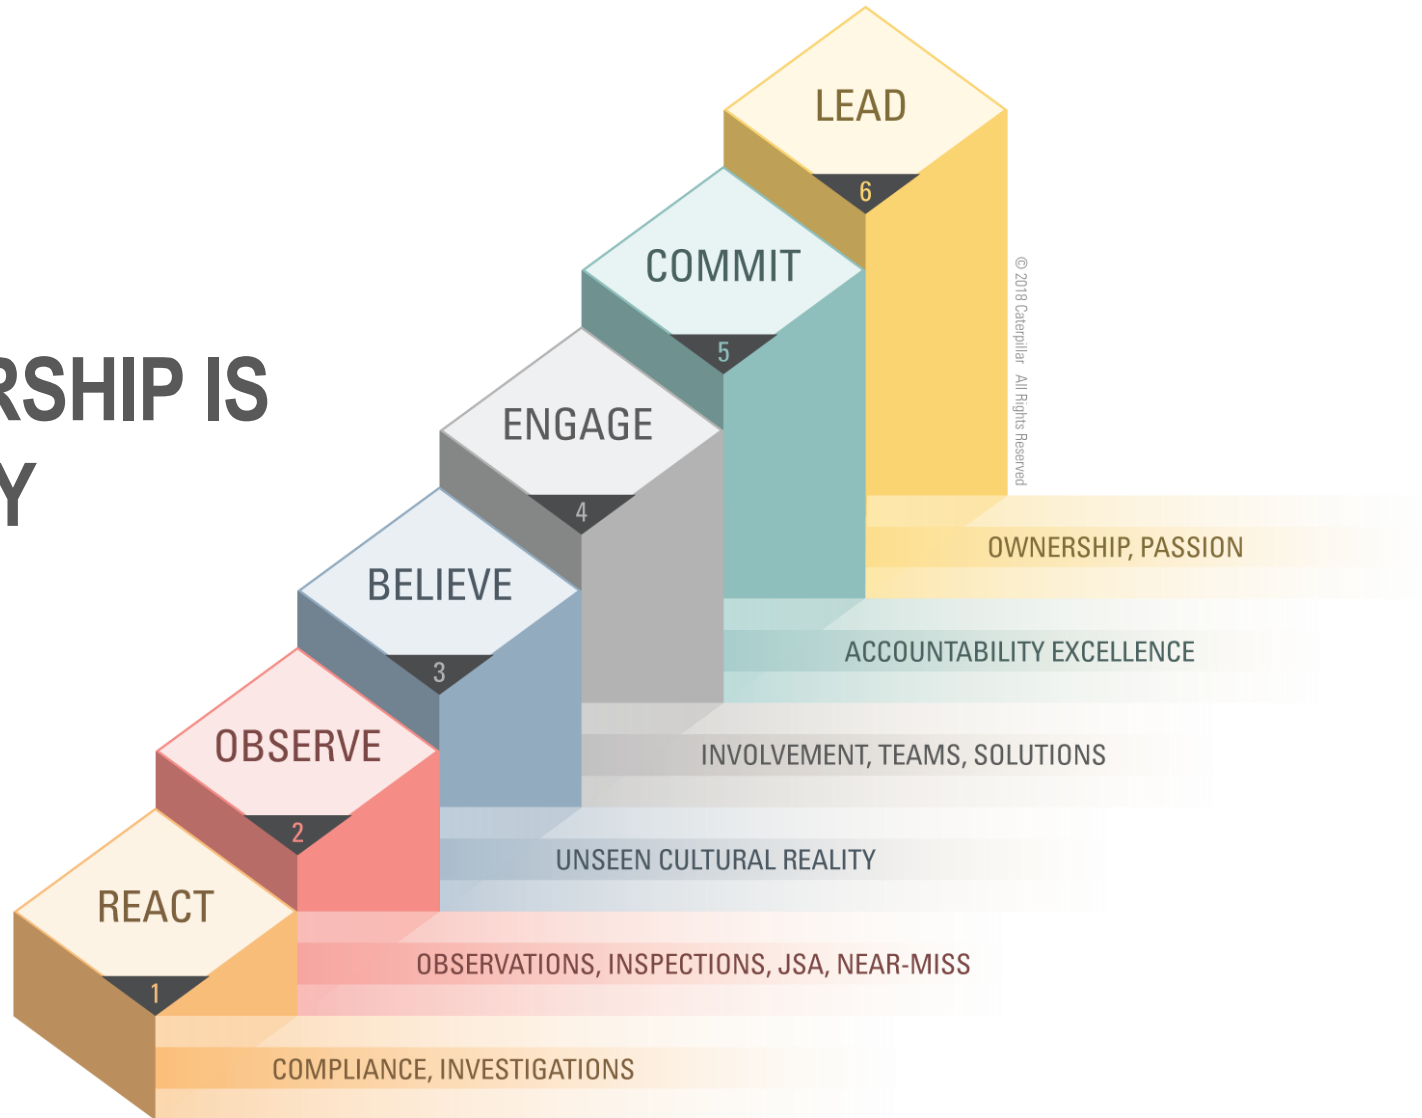

WHY INCIDENTS HAPPEN

A photograph of two construction workers in hard hats and safety vests standing on a dirt and gravel surface, engaged in conversation. In the background, a white CAT service truck and a yellow Caterpillar off-road vehicle are visible. The scene is set outdoors under a cloudy sky.

**SAFETY AND LEADERSHIP
GO HAND IN HAND**

LEADERSHIP IS THE KEY

THE FOUR DOMAINS

– EXPANDED –

Domain #1: Drive Accountability

“You can’t get a culture of safety excellence without accountability!”

- Dr. Dan Petersen
Authentic Involvement

ACCOUNTABILITY

When a leader creates a culture of strong accountability . . .

- Everyone knows what's expected and how it is measured.
- High quality training is provided to ensure the ability to execute.
- Appropriate feedback, both positive and developmental, is provided to steer employees toward safe performance.
- Everyone has the resources they need to work safely.

ACCOUNTABILITY ELEMENTS

Domain #2: Create Connectivity

“Everyone communicates, few connect.”

- John Maxwell

CONNECTIVITY

When a leader creates connectivity . . .

- Everyone understands that safety is integrated into the entire operation.
- Safety is an equal area of focus with production, quality, finance, and customer service.
- Employees are involved in identifying and solving safety problems.
- Every employee is kept informed of all relevant information needed to work safely.

CONNECTIVITY ELEMENTS

Domain #3: Demonstrate Credible Consciousness

“Claiming that you are what you are not will obscure the strengths you do have while destroying your credibility.”

- Tom Hayes

CREDIBLE CONSCIOUSNESS

When a leader is credibly conscious, he/she...

- Understands the safety processes within the team
- Has the necessary information to make wise, informed safety decisions
- Effectively appraises risks where they exist
- Internalizes safety concepts and applies them personally
- Continually learns and grows in their ability to lead a culture of safety excellence

CREDIBLE CONSCIOUSNESS ELEMENTS

Domain #4: Build Trust

“Trust is the one thing that changes everything.”

- Stephen M.R. Covey
The Speed of Trust

TRUST

When a leader builds high trust, he/she . . .

- Demonstrates care and concern for their own safety and the safety of others
- Is accessible and available to those they lead
- Fosters an environment of free-flowing communication that inspires others to trust them.
- Values safety as core evidenced in decision making and communication

TRUST ELEMENTS

SIGNIFICANT FINDINGS

From the statistical validation study...

- Strong safety leadership creates a safer workplace.
- Leaders with **more than 9 direct reports** experience lower leading indicator performance.
- **Accountability** is the strongest driver.
- **Trust** is the highest predictor of reduced incidents.
- Top 3 elements are **defined expectations, integrating safety, and sharing information.**
- **Higher level leaders** generally outperformed front line leaders.
