Social Listening

Informing Clients on Talent Attraction Insights

- Social listening identifies and compiles conversations in over 40 languages from across the web relevant to your brand and analyzes the content of those conversations.

Analysis includes...

- Sentiment and drivers of sentiment with the detection of slang, sarcasm and nuances in conversation
- Number of mentions (post volume)
- Deep text analytics, beyond keyword clouds, that can highlight trends and relationships between those trending topics
- Demographics, psychographics and affinities
- Location information for geo-tagged data
- Influencers within the space
- And more!
